Education

Tunis Business School

Sep 2022 – June 2026

Major IT, minor BA

- Courses: Business Intelligence, Machine Learning, Data Analysis, Object-Oriented Programming

Carthage Byrsa High School

Sep 2018 – 2022

Math Baccalaureate with honors

Amideast Tunisia

2017 – 2019

English (CEFR B1)

École Gustave Flaubert

2017 – 2019

French (DELFI B2)

Experience

Data Validation Intern

Feb 2026 – July 2026

Cognira

- Designed and implemented a Semantic DAG validation engine, eliminating the need for manual metric verification
- Built a web UI and dashboards for analysing calculation discrepancy results
- Identified and reported 22+ metric inconsistencies, directly contributing to backend fixes

Node.js · JsonLogic · Prisma · PostgreSQL · React · Next.js · Material UI · D3.js

Data Automation Intern

July 2025 – Oct 2025

Hi Talents

- Built an automated content curation system from scratch, reducing manual curation time by 80%
- Set up an AI validation pipeline combining similarity matching, fact-checking, and security defenses to filter submissions at scale
- Engineered a RAG-based enrichment pipeline using OpenAI SDK and vector embeddings to automate semantic content categorization.

Node.js · Mastra · OpenAI · NLP · RAG

Frontend Intern

Aug 2024 – Oct 2024

The Mashroom

- Ran SEO audits, then implemented fixes that improved our score from 40 to 83, fixing 15+ issues.
- Created responsive UI components for the company website and optimized page load times from 4.2s to 1.8s.

React · Figma

Projects

Auction Management API | Solo Developer, Sep 2024

Python, SQLite, JWT

[Github link](#) 

- Designed and built a REST API for managing detained goods and auctions in Tunisian ports
- Implemented role-based access control, authentication, bidding workflows, and automated winner assignment
- Built real-time auction updates and structured endpoints for goods, auctions, bids, and users

Flight Delay Prediction Model | Solo Developer, Sep 2025

[Github link](#) 

*Python, XGBoost,
Scikit-learn, CatBoost*

- Built ML models (XGBoost & CatBoost) predicting Tunisair flight delays
- Achieved RMSE $\simeq$ 46 minutes and MAE $\simeq$ 30 minutes, improving the prediction of medium delays with a weighted sample strategy

Certificates

OCI AI Foundations Associate, Oracle

Sep 2025

Machine Learning with Python, Cognitive Class

Aug 2025

Learning AI Through Visualization, Columbia+

Jul 2025

Elements of AI, University of Helsinki

Apr 2025

Civic Engagement

Sustainable Campus Vice President, 3ZERO TBS

Sep 2023 – Aug 2025

Member, Google Developer Student Club TBS

Nov 2023 – Aug 2024

Member of the Training & Academic Affairs Department, Timun TBS

Oct 2022 – Aug 2024
